Founded:	2005		
		Admission Contact:	Carol Grieve
Address:	743 Gold Hill Pl., #257 Woodland Park, CO 80863	**Executive Contact:**	Bill Dean

The Mission of Eagles Nest School for Boys is to assist each student to not just change their behavior in order to meet their parent's or society's standards, but rather to create that change for themselves in order to live a joyful and productive life. Further, it is our Mission to assist this process to occur within 7 to 9 months.

Our Typical Student demonstrates one or more of the following: Low self-esteem, depression, dependency issues, disrespect and defiance, addictive behaviors, use of drugs, poor peer choices, issues of adoption, feeling isolated and abandoned, a feeling of confusion about who they are, out-of-control behavior, constant loss of temper, a decline in academic achievement or underachieving to his potential, having minor brushes with the law, unwilling to be responsible for his choices and consequences, lack of motivation, sees the world in terms of 'blame' and 'victim', and/or having experienced some form of abuse.

We employ many different healing, teaching and change modalities: individual and group coaching, therapeutic counseling, and special energy work called "Tai Yi" (a non-invasive ancient Chinese healing art). We also provide a structured and nurturing environment within a beautiful setting where nature itself becomes a teacher. We use and encourage the principles of natural nutrition and a balanced life style. The inner tools we teach focus on self-discipline, making positive conscious choices, and enhancing self-worth and self-value. We assist our students to choose, understand and live their own important life values. We encourage them to choose a life of purpose and of service to others. Outward tools focus on leadership, teamwork, communication skills, family dynamics, work ethics, and simple practical life management skills. We strongly encourage creativity in their learning process. Most importantly, each boy is greatly assisted using love and compassion in creating their own positive life path.

Individual Psychotherapy Available:	Yes
Accreditation, Licensure, Approval:	State of Colorado, Department of Human Services, Division of Child Care
