Elevations provides an intensive, highly professional, therapeutic program utilizing an interdisciplinary approach. Our program includes; college preparatory academics, therapeutic recreation activities, and individual, family and group psychotherapy. On-site medical and psychiatric services are available to all students.

Our students may be experiencing issues such as clinical depression, anxiety, attention challenges, substance use, post-traumatic stress disorder, borderline personality features, bipolar symptoms and other associated psycho-behavioral concerns.

Students are housed in small single gender therapeutic communities which allow for student mentoring, team accountability and peer oriented social development. Unlike dormitory living, the school setting is coeducational to provide students with a more traditional high school experience. All classes are taught by teachers who are credentialed in their subject area. Our class size typically averages 8-12 students thus allowing for more individualized instruction and support.

Our clinical philosophy is based upon Systemic, Relational and Social Learning theories. Within the integrated framework of these three theories, the treatment team at Elevations individualizes treatment based on the family's needs. The clinical care provided relies on Evidence Based Practices which are well-documented, effective approaches to treatment. Individual, group, and family therapy are provided by masters or doctoral level clinicians. Highlights of our clinical program include; 25+ hours of weekly clinical and therapeutic services, expertise in ADHD & Executive functioning, Trauma work utilizing EMDR and Trauma-Focused CBT, Substance Use, Dialectical Behavioral Therapy and Art Therapy. Elevations offers 6-8 on-site Parent Seminars per year.

Our Therapeutic Recreation Services address the adolescent's need for physical, emotional and mental outlets through structured physical fitness, outdoor education, experiential education, community service learning and leisure education opportunities. These programs are available to all students and are intended to support treatment goals set forth by each student's treatment team. Regular consultations with the clinical team and medical staff ensure that each student's needs are being met along with a high standard for safety in all activities.

Individual Psychotherapy Available: Yes
