THREE SPRINGS

Tuskegee Secure Program, Tuskegee, AL

Three Springs of Tuskegee is committed to providing the resources, opportunities and protection necessary for your child's physical, mental and spiritual growth. We believe that showing your child the consequences of his actions and positive peer pressure will teach him personal responsibility, and we hold each student accountable for his behavior and actions.

Tuskegee specializes in treating adolescent boys ages 12 through 18 who have been or currently are adjudicated. Although this program does not admit children from private referrals, it is available for contractual relations with government organizations. This intensive therapeutic, educational and cultural program will help your child grow physically, mentally, creatively and spiritually.

We know that nothing and no one can ever replace a family in a child's life - that it is not our intent. The purpose of Three Springs of Tuskegee is to return to you a child made whole by a reality based, intensive cognitive behavioral treatment.

Our multidisciplinary staff works as a team to individualize treatment for each student. Your child will receive individualized treatment once every two weeks and as needed. Due to the serious nature of the problems that bring adolescents to Courtland, an emphasis is placed on supervision and structure for each student. Boys reside in closely monitored private or semiprivate rooms, depending on their therapeutic needs.

After your child experiences all of the growth opportunities at Tuskegee - the behavioral, cognitive and experiential therapies - he will become a happier, more satisfied, more responsible and more mature young man.

Our 114-acre campus is host to a full gymnasium and two athletic fields. We will strive to develop and nurture your child's self-esteem and social skills through healthy competition and sportsmanship. Nearby Chewacla State Park offers an excellent opportunity for our students to hike, canoe, swim and bike. They are accompanied on these outings by highly qualified, experienced activities instructors.

Your child will be able to take full advantage of the culturally-enriched activities that Tuskegee affords, such as the Carver Museum, The Oaks, the Chappie James Museum, the Historic Campus District. At all times we foster creativity. Our facilities include a theater, where we encourage our students to participate in stage productions and musicals. The boys are also invited to write articles, editorials and poetry for our quarterly newsletter. These autonomous activities teach your child that he can use his voice to vent his frustrations and express his issues in an appropriate manner.
